

Cameron Healthcare Center

CommuniCare Spotlight

Congratulations to Cameron Healthcare Center for winning a Silver-Achievement in Quality of the American Health Care Association- National Quality Award. The quality awards program is a progressive program that is based on the Baldrige Criteria for Performance Excellence. A nationally recognized approach to performance excellence that focuses on systems-based quality improvement to create sustained levels of performance over time in the areas of leadership, strategic planning, customer and workforce operations and knowledge management.

The Cameron Healthcare Center will be nationally recognized for achieving the Silver- Achievement in Quality and will be among the best ranked in long term care. To qualify for such a prestigious award, Cameron Healthcare Center had to score better than national average for hospital readmissions, urinary tract infections, off-label use of antipsychotics, falls and pressure ulcers.

This is the second time in four years under the executive director leadership of Brooke Francis that Cameron Healthcare Center has won this award. Brooke will be traveling to Denver Colorado in the fall to be recognized and receive the center award.

Cameron Healthcare Center is located at 20 Wilson Drive in Cameron West Virginia. The center is a 60 unit health care center that offers skilled and long term care, therapies- physical, occupational and speech, palliative care, and both residential and family council.

Congratulations again to Brooke and her entire staff at Cameron Healthcare Center for serving with pride.

Brooke Francis
